Broadly Adapted Hybrid for Excellent Potential Across Yield Environments

- Very strong stalks for season-long standability
- Outstanding late-season plant health and intactness
- Strong performance under drought conditions

Agronomic Characteristics

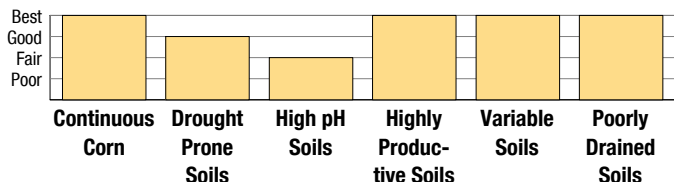

Disease Tolerance

Gray Leaf Spot	3
Northern Corn Leaf Blight	4
Goss's Wilt	3
Bacterial Leaf Streak	4
Southern Corn Leaf Blight	5
Eyespot	-
Anthracnose Stalk Rot	-
Tar Spot	-
Fusarium Crown Rot	2
Common Rust	-
Southern Rust	-

Plant & Ear Characteristics

1-9 Scale: 1 = Best, Tallest or Highest; 9 = Worst, Shortest or Lowest; (-) = Not Available.

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn and soybeans, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control.

Ratings are based on interpretation of data gathered by Syngenta and/or observations across areas of adaptation and may change as additional data are gathered. Product performance assumes disease presence.
